

# UNDERWATER HOUSINGS for Digital Cameras - Underwater Cameras

*Aquapics*

## Sealife Reefmaster Universal External Flash

Price per Unit (piece): £299.99 (including 17.5 % tax)

Sealife Reefmaster flash for all digital cameras

Finally a universal flash for all digital cameras\*. Scuba divers know that a strobe is the most important accessory for sharp, colorful pictures. Water absorbs the red and yellow light spectrum resulting in blue pictures. The powerful SeaLife® Digital Pro Flash causes the intense colors of coral and fish to "explode" . Even two flashes can be easily mounted to all cameras. The powerful SeaLife® Digital Pro Flash works with all SeaLife cameras and other brands of cameras that have up to 4 pre-flashes.

Features:

New Auto Mode setting adjusts flash brightness for optimal image exposure

Depth rated to 200 ft/ 60 m.

Variable power adjustment allows user to manually fine tune flash brightness for desired effect and image exposure.

5 pre-flash cancellation settings

Effective underwater distance range from 2 to 8 ft. (0.6 to 2.5 m).

Approximately 100 flashes with 4 AA batteries (not included)..

Flexible, rubberized arm for easy aiming and sure grip.

Includes flash link optical cable connection (SL962).

Deluxe carry case included
