## Cool Flash Nano

The Fantasea Cool Flash Nano is perfect for all digital Aim and Shoot cameras including those with the "Pre Flash" function. **The kit is easy to use and will bring extra clarity and colour to your pictures.** The "Nano" is an ultra compact digital slave strobe and underwater protective housing kit. **The strobe unit triggers in sync with your digital camera's internal flash by a small light sensor in the strobe body.** Simple operation, good performance and small size make the "Nano" a must have accessory for underwater digital camera imaging, or for anyone who needs waterproof strobe protection for wet outdoor sports and severe environments. Furthermore, the strobe can be removed from the housing and used as a land strobe in dry conditions.

With a guide number of 12 (Air, ISO 100 x 1 meter. At one foot, the guide number is 39), and running on two lightweight AAA batteries,

The "Nano" has three flash modes to suit a wide variety of digital cameras. Whether your camera is capable of Manual mode, or has one or two pre-flashes to set exposure, the Cool Flash Nano ensures correct exposure with all such camera types. **Can be used with out Fiber Optic cable or with.**

**You Can Now Add The single Stay plate for an extra £11.99 so you just take the strobe with out the light.**
